Set to drop next month, here is an official look at the Vans Authentic Womens Tie Dye Collection. For decades, tie dye has transcended the streets of San Francisco's Haight & Ashbury and has found a place amongst fashion and streetwear emerging as the latest trend for spring. Vans first debuted tie dye printed uppers in the late '70s and this season the brand brings back the design application for a three-piece offering of tie dye printed Eras.

The pack will consist of three tonal leather constructed offering of the Vans Authentic Mens. You have your choice of picking up the black, white or grey colorway. The premium leather upper sits on top of the tonal vulcanized midsole. Minimal branding is placed on areas such as the side panel and heel counter. Subtle in appearance, the pack let's its quality do the talking.

We get a bunch silhouettes working these elaborate prints but honestly, I feel like none of the can do what the Vans Authentic Cheap can do.

The Vans Authentic Sale is constructed in textile materials this time around, creating an original print with stripes, diamonds, the who nine yards. The upper trades off between blue and black, while a turquoise hue handles some of the print.
