Another version of the ever-so-popular Adidas Stan Smith Women has been unveiled. Opting to come in a tonal suede upper, don't let its simplicity fool you, this is definitely a good looking sneaker. The Adidas Stan Smith Sale ditches the customary leather upper and comes dressed in an Onyx (grey) suede upper. The suede upper is complimented by the tonal leather hits found on the heel and the tonal branding found on the tongue and heel. Perforation holes are found on the side panels which are meant to represent the Three Stripes branding.

Just yesterday we gave you a first look of a never before seen feature used on the Adidas Stan Smith Men. I'm talking about the use of Zig Zag embroidering used in place of the Three Stripes branding. Today we have another adidas Originals Stan Smith utilizing yet another feature we've never seen on the classic adidas model. This time around the adidas Originals Stan Smith will come equipped with a platform sole unit.

Opening Ceremony brings us the third chapter of their take on the classic Adidas Stan Smith Cheap silhouette, and it features a straight trippy almost three-dimensional diamond pattern with hands stretching through covers the shoe. An off-white rubber sole serves a nice contrast against the bonkers upper and grey premium full grain leather detailing on the heel and Opening Ceremony-branded tongue tab is a nice touch.
