Kanye West’s Buy Adidas Yeezy Boost 350 will unleash the first MX version on October 23rd as the MX Oat Yeezys are finally due for a release. Following that wild mix of yellow, blue, and orange is the MX Rock Yeezy 350 in December, followed by a never-before-seen iteration of the comfy knits in 2022. No official nickname in circulation, but “MX Blue” seems fitting for now as the shoe is primarily covered in that tone. However, with swirls of earthy browns and beiges mixed into the knit construction of the upper, there’s a chance that these have some sort of planetary connection.

Come June, we’ll have the entire “Mono” pack of Adidas Yeezy Boost 350 Outlet to enjoy. A stark contrast to its iterations prior, the forthcoming “Clay,” “Ice,” and “Mist” colorways feature new tweaks to the silhouette’s structural design. Instead of the usual Primeknit, each opts for a sheer, monofilament mesh that’s complemented by a matching inner cage. What’s more, the side stripe shades to each respective lead, while the laces and back heel tab prefer a somewhat lighter hue.

Initially speculated to be the highly-anticipated Adidas Yeezy Boost 350 Shoes, the Yeezy 380 “Covellite” is set to launch on March 15th. While not as eye-catching as other Yeezy release dates 2021, the forthcoming pair delivers a compelling arrangement. Deep shades of navy take over the Primeknit upper, with the pattern closest to the midsole appearing purplish in certain lighting.

Black joins the mix at both the laces and collar, creating a fashion faux pas that the Yeezy-frontman surely couldn’t care less about. Men’s Adidas Yeezy Boost 350 As with several other propositions from the adidas-backed subsidiary, the “Covellite” colorway is accompanied by a semi-translucent midsole encapsulating BOOST-cushioning. The mineral-inspired navy pairs well with the gum brown finish that overtakes the tooling.
